

experiences even with limited connectivity.

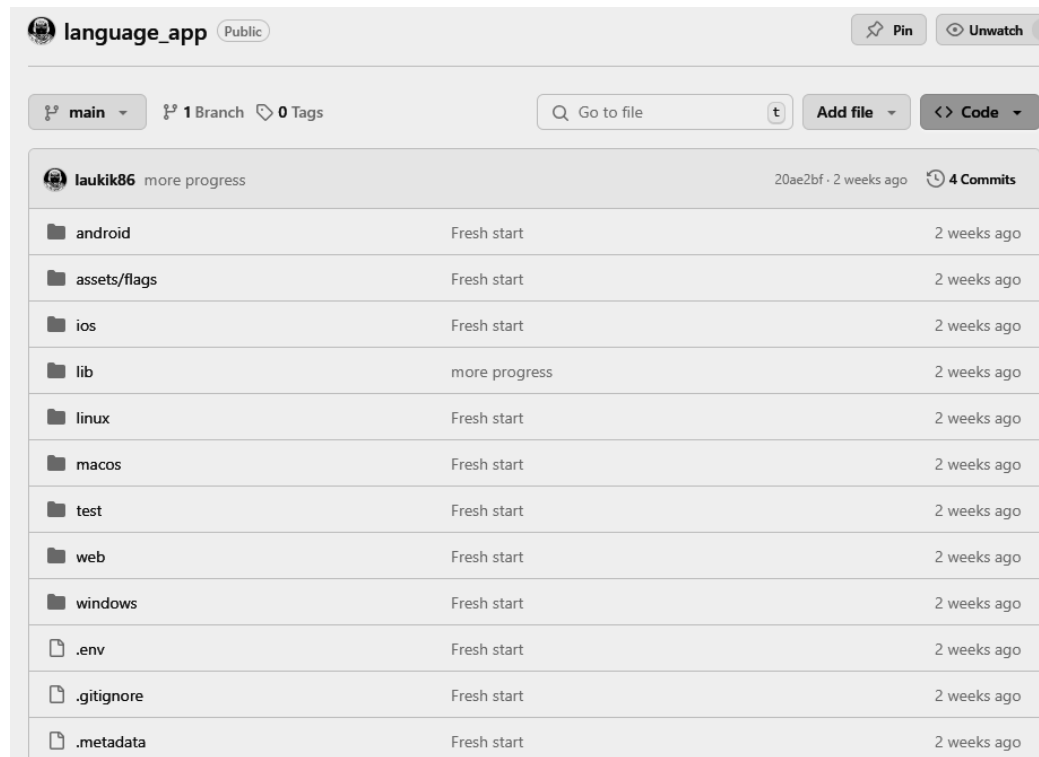

## **Experiment No. 10**

**Aim:** To study and implement the deployment of the E-commerce PWA to GitHub Pages.

### **Explanation :**

In this experiment, we deployed our E-commerce Progressive Web App (PWA) to GitHub Pages using the gh-pages package. This allowed us to host and share our PWA publicly through a GitHub repository.

Screenshot:

### **Conclusion:**

By successfully deploying the E-commerce PWA to GitHub Pages, we made the app accessible online through a live URL. This experiment helped us understand the deployment process and the importance of version control and static hosting for PWAs.
