

Experiment No. 7

To write meta data of your Ecommerce PWA

Aim:- To write meta data of your Ecommerce PWA in a Web app manifest file to enable “add to homescreen feature”.

ScreenShots:

```
{ } manifest.json > ...
1  {
2    "name": "LangLearn - Language Learning App",
3    "short_name": "LangLearn",
4    "start_url": ".",
5    "display": "standalone",
6    "background_color": "#ffffff",
7    "theme_color": "#6200EE",
8    "description": "Learn languages with vocabulary quizzes and audio practice!",
9    "icons": [
10     {
11       "src": "icons/icon-192.png",
12       "sizes": "192x192",
13       "type": "image/png"
14     },
15     {
16       "src": "icons/icon-512.png",
17       "sizes": "512x512",
18       "type": "image/png"
19     }
20   ]
21 }
22
```

Conclusion:

By adding metadata in the manifest.json file, we enabled our Ecommerce PWA to support the "Add to Home Screen" feature, improving user accessibility and enhancing the app-like experience on mobile devices.
